Bringing Big Business Solutions to Everyday People

Demo Rules & Guidelines

All sales teams are provided Trackem demo lines for your team’s use. These demo’s are provided at no cost to the dealer. The demo account is for your team to learn about Trackem, and to provide demo’s to clients who may wish to try the service before subscribing.

The demo account is to be managed by a specified individual within the company. This is your locations manager, team leader, or dealer principal specified on the first page. This person will be responsible for the management of the demo account.

The dealer must follow the guidelines below to maintain an active Trackem demo account.

1. All demo’s must remain active on a daily basis reporting to the Trackem servers.
2. Customer information retained during a demo period must be treated with extreme security and privacy. This information is for clients use only.
3. Dealers must be actively selling Trackem on a monthly basis.

The demo accounts are reviewed monthly. Should the above criteria not be met, the demo account will be cancelled.

Additional demo lines are available upon request to dealers whose demo accounts are active, and who are actively selling Trackem. SiM has a limited number of lines available to our dealer base therefore it is our mandate to have those lines available to our active dealers.

To order your demo lines, please complete this form in its entirety and fax it to SiM at 1-888-524-1110. You will receive all details in respect to your demo account by email within 48 hours.

TRACKEM OPENS DOORS – USE YOUR DEMO’S

Thank you in advance for your partnership and support,
